FOR IMMEDIATE RELEASE

Sealevel Partners with AUSA for EUROSATORY 2024

LIBERTY, SC, USA May 9, 2024 – Sealevel Systems, Inc. announces its exhibition at [EUROSATORY](#) in Paris, France, June 17-20, 2024. Recognized as the leading conference for defense and security, this year's event signature is "Protect Your Future." The theme embodies EUROSATORY's enduring commitment to "inventing responsible defense and security for the world of tomorrow."

"We take pride in our long-standing relationships with every major U.S. and Allied nations defense contractor. EUROSATORY is an ideal opportunity not only to connect with our partners in the defense and security ecosystem but to also learn as we keep an eye on the future of technology development and actively work to develop solutions for threat mitigation," said Earle Foster, Sr VP of Sales for Sealevel.

Sealevel's stand at Hall 5a, Stand DE330 is part of the USA Security and Defense Pavilion, organized by the Association of the U.S. Army (AUSA).

Supporting the Future of Intelligent & Remote Warfare
Sealevel will showcase a variety of COTS, mission-ready products and bespoke, customized solutions for advanced systems. Stand visitors will be able to preview to-be-released computers from Sealevel, including a robust edge controller. Key product demonstrations include:

- ***Embedded Computers & Rugged Touch Panel Controllers***
  For adding intelligence and control to your system, [defense computers](#) from Sealevel are intentionally designed to meet quality, reliability, and processing power needs – all while withstanding environmental extremes. Controllers meet requirements for hazardous environments as well as stringent military standards for operating temperature and shock and vibration.

- ***COTS Synchronous & Asynchronous Solutions***
  With a commitment to reliability and long-term availability, Sealevel offers the widest selection of [serial](#) choices for radio, radar, telemetry, and other data-intensive applications. Sealevel's complete line of [ACC-188 synchronous serial radio adapters](#) will also be available.

- ***USB & Ethernet I/O for AI & Unmanned***
  Sealevel's extensive I/O line enables robust control and communications for a wide range of unmanned and vision system designs including UGVs, UAVX, and UUVs. Specifically, Sealevel's [Ethernet data acquisition devices](#), used in A-UGV applications, will be on display.

Delivering Design & Manufacturing Excellence Since 1986

ABOUT EUROSATORY
The exhibition EUROSATORY is the global land and air benchmark event for Defense and Security (D&S). The show is organized by COGES Events, a subsidiary of GICAT (French Land Defense and Security Industry Association), and a member of CIDEF (French Defense Industries Council). The aim of EUROSATORY is to contribute to "Inventing the responsible Defense and Security of the world of tomorrow" to tackle all types of crises.

MORE THAN A MANUFACTURER: SEALEVEL SYSTEMS, INC.
Sealevel Systems, Inc. advanced the industrial I/O and embedded computing industry with the first RS-422/485 communication adapter for the IBM PC. Since 1986, Sealevel has continued to redefine design, engineering, and manufacturing for COTS and full-custom computers, carrier boards, synchronous serial servers and adapters, and robust firmware. All Sealevel products are engineered and manufactured at our ISO 9001:2015 registered headquarters in Liberty, South Carolina with a quality and availability promise to outlast your mission. For more information, visit sealevel.com or call +1 864.843.4343.
