New Weapon Stabilization from VINCORION

Media representatives are invited to attend a presentation on the new GTD chaser^V weapon stabilization system from VINCORION for the LEOPARD 2 and other armored vehicles at Eurosatory 2024.

Wedel/Paris, June 7, 2024. The technology company VINCORION will be showcasing its latest innovation at Eurosatory 2024: the GTD chaser^V weapon stabilization system, which is utilized in the LEOPARD 2 main battle tank and other armored vehicles, including the Puma and the Boxer.

Media representatives are cordially invited to a special press meeting at the VINCORION stand (**Stand C 290 in Hall 5 B**) on **June 19 at 1:30 pm**. The experts from VINCORION will present the technology in detail and be available to answer questions in a relaxed atmosphere with drinks and snacks. Contact persons include Sascha Brüning, Vice President Business Development and Sales, and Daniel Zeitler, Head of Product Management.

High-level "Green Defense" panel discussion

On the afternoon of June 19, VINCORION is also extending an invitation to media representatives to a panel discussion on the topic of "Green Military." The panel will discuss how NATO member countries can achieve their climate goals and maintain tactical superiority, with a particular focus on Germany's future energy systems. The panel will include the following experts:

- Dr. Constantinos Hadjisavvas, Project Officer Energy EDA / CF SEDSS
- Col. Robert Šipec, Slovenian Ministry of Defense
- Raphael Danino-Perraud, French Ministry of Defense
- Sascha Brüning, Vice President Business Development and Sales VINC ORION
- Daniel Zeitler, Head of Product Management, VINCORION
- Dorothee Frank from cpm Defense Network will moderate the discussion

The panel will take place at **4 p.m. in the "Charlie" area** in Hall 6, close to the entrance area. We cordially invite you to report on it.

Further highlights at the VINCORION stand:

"We are delighted to be able to present the largest number of products in recent years," says Sascha Brüning ahead of the trade fair. "In addition to the GTD chaser^V system, there will be tactical energy systems and hybrid power generators on display."

- VINCORION will be presenting innovative solutions for the energy supply and stabilization of defense systems. These include a genset with hybrid technology for supplying the "Patriot" air defense system and a genset for the IRIS-T system.
- Three generators from the EPG husky^V product group will also be on display. These generators are used in armored vehicles and other applications.
- A "holobox" presenting the GTD chaser^V system.
- A model of the SEA power generator, which interactively displays state-of-the-art generator systems. VINCORION develops these gensets in various power classes between 50 and 200 kilowatts for the German Armed Forces.

About VINCORION

VINCORION is a leading technology company from Germany that specializes in the development and manufacture of systems and components for demanding applications in the defense, aviation, and industrial sectors. Learn more at www.vincorion.com.

About Eurosatory

Eurosatory is the world's largest and most important trade fair for land and air defense. It takes place every two years at the Parc des Expositions Paris Nord Villepinte and showcases innovations in twelve key technology areas, including drones, robotics, cybersecurity, and artificial intelligence. Over 1,551 exhibitors and around 62,000 trade visitors are expected to attend.

*We look forward to seeing you in Paris on **June 19 at 1:30 pm** at stand C 290 in hall 5 B and we would be delighted to receive a short confirmation of your participation..*
