

News from Saab 10 June 2024

Saab at Eurosatory 2024

Saab will be exhibiting at Eurosatory, Nord Villepinte Exhibition Centre, Paris from June 17-21 2024. The main Saab stand will be located in Hall 6 H176, with a separate stand located in Hall 5B C225 where Saab's Deployable Healthcare Solution is on display.

Saab will hold a press briefing on Sirius Compact, covering the latest product and business developments of this modular and scalable passive Electronic Warfare sensor. Deployed individually or as a network, these sensors provide a true force-multiplier by enhancing situational awareness through the silent detection, classification and prioritisation of radar and datalink emissions.

The Sirius Compact press briefing will be held **Tuesday 18th June 11:00-12:00** at the Saab stand.

Eurosatory will mark the first public showing of the Compact Radar Module using the lightweight, multi-mission, Giraffe 1X surveillance radar. Giraffe 1X Compact Radar Module will help users to swiftly achieve situational awareness wherever they are, which is an increasingly important operational need. A brief overview on the Compact Radar Module will be included in the Sirius Compact press briefing as above.

Appearing for the first time at Eurosatory, Saab's Deployable Healthcare Solutions provide unique lightweight flexible systems for tactical combat casualty care across the spectrum, from point of injury to NATO Role 1 to Role 3 field hospitals. Visitors can see and learn more about how militaries and disaster relief agencies can help deliver medical support in the most challenging of conditions.

Other key products on display include Saab's vehicle mounted solutions on an Oshkosh Joint Light Tactical Vehicle such as a Barracuda Mobile Camouflage System, CBRN detection and classification system, MSHORAD air defence missile system and a mast mounted Sirius Compact.

The renowned Carl-Gustaf, AT4 and NLAW from Saab's ground combat family will be on display, as will Saab's suite of Training and Simulation capabilities to provide for a wide spectrum of training scenarios.

Visitors are welcome at the stand to see and learn more about Saab's newest technologies and solutions that keep users one step ahead on the modern battlefield.
