

OSINT at Operational Speed — DataScouting

DataScouting's MediaScouting OSINT gives defense and national security operators the AI-powered edge to monitor, detect, and act - faster than the threat.

Hall 5a, Stand H402 (Hellenic Pavilion) | Paris Nord Villepinte | 15–19 June 2026

18th of June 2026 - DataScouting is presenting MediaScouting OSINT at Eurosatory 2026: an AI-native platform engineered to give government, defense, and national security operators decisive operational superiority over an increasingly complex open-source environment.

Structured OSINT for Defense & Security

In today's information battlespace, maintaining situational awareness, understanding narratives, detecting disinformation, and preserving information superiority are critical to operational success. DataScouting's AI-driven OSINT platform delivers the clarity needed to act under pressure and enable intelligence-led decision-making.

- **Collect:** monitor and analyze TV, radio, IP streams, dark web, online news, print, and social media in one place;
- **Understand:** leverage AI agents, speech-to-text, entity recognition, logo/face recognition, sentiment analysis;
- **Detect:** gain real-time situational awareness, disinformation campaigns, hybrid threats, cognitive warfare activities, emerging risks, and narrative shifts;
- **Act:** rely on real-time alerts, dynamic dashboards, 360° operational view, 24/7 continuous coverage.

Operational Superiority Through AI

MediaScouting OSINT automates classification, prioritization, and contextualization at scale. Large Language Models (LLMs), OCR, speech recognition, and NLP work in concert to eliminate information overload and deliver only what matters, on time, every time.

The platform deploys on-premises or in air-gapped environments, meeting the stringent security requirements of national intelligence units, counter-terrorism agencies, crisis management centers, and law enforcement forces, with no compromise on performance.

See It Live at Eurosatory 2026

Visit DataScouting at Hall 5a, Stand H402 (Hellenic Pavilion) for a live demonstration of MediaScouting OSINT. Opening hours: Thursday: 9am to 5pm
Friday: 9am to 3pm

About DataScouting

DataScouting is a software innovation company with over a decade of experience delivering AI-powered OSINT solutions to government, defense, law enforcement, and enterprise clients. Headquartered in Thessaloniki, Greece, its mission is *Actionable Intelligence*. Learn more at datascouting.com
