

iXnov, Strategic Partner for Embedded Electronic Solutions

France | March 2, 2026 – ACKSYS, NCS SYSTEMS, PLANAVISION, and TECHWAY are joining forces under iXnov. This new organization brings together their areas of expertise and strengthens iXnov's positioning in industrial computing and embedded solutions.

120 Years of Combined Expertise Driving Innovation

With iXnov, the objective is to structure complementary expertise and reinforce the group's ability to deliver complex technological and embedded systems projects across defense, aerospace, transportation, and advanced industry sectors.

In a context of digitalization, performance, cybersecurity, and industrial sovereignty, iXnov positions itself as an agile and sustainable partner, capable of ensuring service continuity and offering extended coverage—from the design of specialized electronic solutions to industrial system integration.

From 2026, iXnov Accelerates Industrial Project Execution

The creation of iXnov is built around four strategic objectives:

- Align strategy (target markets, investments, innovation)
- Accelerate execution through strengthened governance and synergies
- Strengthen the group brand (visibility, credibility, attractiveness)
- Deliver an integrated offering with expanded service continuity

Mission & Commitments

Our mission: to design and deliver complex systems tailored to customer requirements and environments, combining technological expertise, industrial excellence, and long-term sustainability.

This ambition is based on four pillars:

- Technical excellence: innovation, quality, reliability
- Customer approach: co-design, engineering, satisfaction, complementary expertise
- Industrial footprint: local/European production, critical skills, technological sovereignty
- Support: accelerating competitiveness and technological advancement

iXnov: A Unifying, Scalable, and Future-Oriented Identity

iXnov brings subsidiaries together under a shared identity designed to support the group's growth:

- i – Industrial / Intelligence
- X – Excellence / eXtreme / eXigence
- nov – Innovation
- Tagline: “*Innovating together*” reflects collective innovation (R&D, engineering), based on collaboration between subsidiaries, teams, and customers
- Logo: inspired by a neural network, symbolizing interconnected expertise and skill synergy, with the customer at the center of the ecosystem

Statement

“With iXnov, we are strengthening our growth and innovation capabilities by structuring our expertise to better support our customers and anticipate their needs. This key milestone reflects our ambition to become a leading player, capable of delivering high-level integrated solutions in a constantly evolving market,” says Stéphane Roger, CEO of the iXnov Group.

Key Figures

iXnov currently generates €40 million in revenue, employs nearly 120 people, and aims to exceed €100 million by 2030.

Subsidiaries

ACKSYS

A specialist in Wi-Fi and cellular solutions, ACKSYS designs robust industrial communication solutions for demanding environments (transportation, industry, robotics, mining, etc.).

NCS Systems

A specialist in industrial computing and embedded systems, NCS Systems designs and integrates solutions for aerospace & defense, transportation, and industry.

Planavision

A specialist in display and video processing, Planavision designs visualization solutions for professional and mission-critical environments.

TECHWAY

A specialist in digital electronics, TECHWAY develops real-time signal acquisition and video processing solutions.
