

Ukraine's private defence industry will be represented at EUROSATORY 2026 in Paris

On 15–19 June, under the national brand ZBROYA, 22 Ukrainian private defence manufacturers will present technologies developed and refined through real combat experience.

The joint stands will feature unmanned systems, electronic warfare solutions, advanced ground robotic platforms, and other technologies designed for the realities of modern warfare.

For Ukraine, EUROSATORY 2026 is an opportunity to present not only individual products, but the capability of the private defence sector to rapidly develop, adapt, and scale technologies that respond to real operational needs.

For international partners, it is an opportunity to meet Ukrainian manufacturers directly and discuss industrial cooperation, joint development, production, and the integration of Ukrainian solutions into broader defence supply chains.

Visit the ZBROYA national stands: E241 and E234, Hall 5B.
