

PRESS RELEASE - EMBARGOED UNTIL 15th JUNE 09:00

9 June 2026

Eurosatory 2026, Paris, France

MOHOC Launches Spine™ Cable Management System at Eurosatory 2026

MOHOC Inc., leader in tactical helmet cameras, is introducing Spine™, a cable management system designed to address a common issue with body-worn and helmet-mounted electronics: unsecured and poorly routed cabling.

Loose cables are prone to snag, disconnect, and interfere with movement. Beyond inconvenience, this impacts efficiency, reliability, and operator safety. Spine™ is a patent-pending innovation to enclose, organize, and secure tactical cabling – keeping power and data connections flush, low profile, and controlled.

MOHOC's innovative new system features a flexible, modular, segmented design. It enables adaptable routing across helmets, load-bearing equipment, and other dismantled gear. Sections have multiple entry/exit points that can be configured in the field for specific loadouts.

“We designed Spine to eliminate loose cables between MOHOC® 2 Cameras and tactical radios. In doing so, we realized the cable mess of dismantled electronics was a widespread concern,” said Connor Duncan, CEO at MOHOC. “Cable management is a small detail with a big benefit, and Spine™ is a straightforward solution to an overlooked problem.”

Spine™ supports a wide range of commercial and MIL-SPEC cables. It is easily installed and removed for body-worn, vehicle, K9, or any other application where cables require securing.

MOHOC will be launching Spine™ at Eurosatory 2026, Hall 5A, Booth D310.

Meeting requests and press inquiries can be directed to Chase Halbert, International Sales Manager (chalbert@mohoc.com).

About MOHOC, Inc. Founded in 2014, MOHOC develops specialized cameras for elite end users. The product line includes the original MOHOC® Camera and MOHOC® IR for video recording, the MOHOC® 2 series for video streaming, Optac™ UAV optics, and a range of accessories. MOHOC products serve the Special Forces, defense, tactical law enforcement and first responders in the US and over 70 countries worldwide. For further information, please visit www.mohoc.com.
