

Paris, June 15, 2026

Press release

Signing of a strategic partnership agreement between I-SEE and the Aerospace Industrial Development Corporation (AIDC)

On Monday 15 June 2026, to mark the opening of the Eurosatory exhibition, the French company I-SEE and the AIDC (Aerospace Industrial Development Corporation), a major player in the aerospace industry in Asia, signed a strategic partnership aimed at developing and deploying a new-generation drone operational capability.

This partnership combines I-SEE's innovative technologies and operational expertise with AIDC's industrial excellence, engineering capabilities and aerospace experience to deliver an integrated solution that meets the growing demands of modern operations.

The combination of technologies developed by the two partners will provide users with high-value-added capabilities that can be rapidly deployed and operate over long distances, delivering a decisive operational advantage in the most demanding environments.

This partnership creates an unprecedented operational capability and aims to accelerate the delivery of innovative solutions that meet the new needs of government customers in terms of security, sovereignty and operational superiority.

The two partners will jointly conduct operational demonstrations, advanced integration programmes and international development initiatives to promote this new offering in global markets.

Chin-Pin Tsao, CEO of AIDC said :

" AIDC is looking forward to start a joint production relationship with I-SEE Group to strengthen the economic partnership between Taiwan and France. "

Jean-Michel Baure, CEO of I-SEE, said :

"By combining I-SEE's innovative agility with the excellence of a world-class industrial leader, this partnership aims to set a new operational standard in its field and meet the needs of tomorrow."
