SCATA UNVEILS THE MK1 PLATFORM AT EUROSATORY 2026

## A New Generation of Modular Mission Platforms Developed Through Strategic Partnership and Nordic Innovation

**SCATA is proud to announce the official unveiling of the SCATA MK1 Platform at Eurosatory 2026, the world's leading defence and security exhibition.**

The MK1 is the result of more than 18 months of design, engineering, development, testing, and cooperation between SCATA and a select group of industry-leading partners. More than a vehicle, the MK1 is built around a common platform architecture that can be configured for different operational roles and mission requirements, for military, homeland security, and critical infrastructure operators.

Built on an 18-ton protected platform, the SCATA MK1 bridges the capability gap between highly mobile tactical vehicles and heavier protected combat platforms. With a range of up to 750 kilometers, the MK1 can be configured with STANAG Level 3 or Level 4 protection. Drawing upon Nordic defense thinking and lessons observed from modern conflicts and demanding operating environments, including Ukraine, Afghanistan, and North Africa, the MK1 has been developed to meet the evolving needs of modern operators.

*"The MK1 is the result of a clear vision: to create a truly modular platform capable of adapting to multiple missions and evolving operational requirements. We are proud to introduce a platform built through innovation, partnership, and a commitment to delivering real capability to modern operators."*

Viktor Ekman  
CEO, SCATA

The MK1 has been developed in close cooperation with KNDS Mobility and Parkano Defence. Together, these organizations have contributed expertise in mobility, protection, survivability, engineering, manufacturing, integration, and mission systems development.

## THE MK1 PLATFORM FAMILY

The platform family currently includes:

- **MK1-ICS** – Infantry Combat & Tank Support
- **MK1-C2** – Command & Control
- **MK1-CUAS** – Counter-UAS & Critical Infrastructure Protection
- **MK1-LOG** – Protected Logistics & Combat Service Support

All variants share a common architecture, simplifying training, maintenance, and lifecycle support while maximizing operational flexibility.

## PUBLIC DEBUT AT EUROSATORY

The **SCATA MK1 Platform** will be officially revealed to the public on 15 June 2026 at Eurosatory in Paris.

**Visitors are invited** to meet the SCATA team and experience firsthand the platform, technologies, and partnerships that have shaped its development.

The **MK1 marks** the beginning of SCATA's long-term commitment to innovation, partnership, and operational excellence.

## ABOUT SCATA

**SCATA is a Finnish** defense technology company focused on developing modular mission platforms and integrated solutions for defense, homeland security, and critical infrastructure protection.
