

# **KNDS** PRESS RELEASE

## **At Eurosatory 2026, KNDS asserts its position as Europe's lead systems integrator across the full land domain**

**Amsterdam, June 12, 2026 – As a leading pan-European land systems integrator, KNDS will showcase its portfolio from June 15 to 19 at Eurosatory 2026. KNDS will demonstrate its new and further developments and present its extensive expertise in the field of technology, system, and mission solutions.**

This underscores KNDS's position as Europe's only pure land systems champion, providing solutions to the needs of fully integrated and interoperable mission and operational solutions.

In this context, we operate at the system architecture level as the Design Authority and Lead Integrator, providing complete end-to-end mission solutions. This approach enables KNDS to cover the full spectrum from our high-performance systems and platforms to networked mission solutions, while remaining fully accountable to the customer as the prime contractor.

### **Mission Solutions**

In the field of mission solutions, KNDS offers a wide range of products, from a Fire Support Command and Control System for artillery battalions to solutions for coordinated, cross-platform networked mission solutions. Here, mission solution means providing continuous operational capability, covering both all tactical and all logistical aspects. KNDS connects manned platforms, unmanned ground vehicles (UGVs), unmanned aerial vehicles (UAVs), sensors, and effectors, and also supports our customers in the creation and revision of the relevant CONOPS (Concept of Operations). This enables early and continuous involvement of KNDS throughout the entire lifecycle, including upgrades, digital services, and maintenance.

### **Main Battle Tanks**

We hold the leading position in European main battle tank projects. KNDS impressively demonstrates its comprehensive expertise in this segment—from firepower, protection, counter-drone capabilities, mobility, and digitalization—and showcases the LEOPARD 2 and Leclerc XLR in their latest variants, the Leclerc XLR, and the LEOPARD 2 A-RC 3.0 technology demonstrator system.

At Eurosatory 2026, KNDS will unveil a previously unseen next-generation main battle tank concept and, as part of the KNDS overall portfolio, illustrate the future European land combat capabilities.

## **Indirect Fire**

As the market leader in the artillery segment, we offer the most comprehensive range of battle-proven artillery systems and ammunition – from highly mobile wheeled solutions to self-propelled howitzers, including the associated cross-platform fire-control solutions. KNDS is presenting a total of seven systems – including a world premiere.

## **Infantry Fighting Vehicles / Armored Carriers**

KNDS offers state-of-the-art IFV/APC capabilities and displays seven systems that are highly adaptable to customers' needs.

## **Robotics**

KNDS Robotics' expertise spans an exceptionally broad range of use cases, from the NERVA micro-robot to armed platforms such as the CENTURIO UGV and the BOXER UAV, featuring an integrated command-and-control system for unmanned systems, including loitering munitions and C-UAV drones.

The THeMIS UGV, equipped with KNDS's modular payload system, represents a new class of unmanned capability designed for integration into digital, mission-oriented operations.

## **Counter UAV**

We respond to current threats through a complete and innovative solutions C-UAS solutions on our platforms that combines detection with neutralization and offers units an integrated “detect-to-effect” process. KNDS also relies on modular options so that anti-UAV capability can be adapted to requirements and integrated on different platforms in a multi-layer approach.

This also includes the development of airburst ammunition and projectiles equipped with proximity fuzes specifically designed for countering UAVs.

## **Ammunition / Turrets & Cannons**

KNDS showcases a wide range of NATO-caliber ammunition, from 20 to 155mm. From anti-drone munitions to tank rounds, through a broad range of artillery ammunition and sovereign loitering munitions with the MATARIS family—further expanded at Eurosatory 2026 with the unveiling of a new system—KNDS covers a wide array of innovative capabilities.

## **Service & Support**

Logistics is today more than ever an integral component of modern mission solutions. With the MULTIBOX system solution, we present a mobile maintenance and logistics system that integrates the supply chain across all logistical levels and brings services exactly where they are needed. By integrating UAVs and UGVs, we significantly reduce transport times and deliver with precision, even on the demanding “last mile.”

Together with our additive manufacturing partners, we produce spare parts quickly and on demand, even in very small quantities or for short-notice requirements. Our customers benefit from highly mobile logistics, short response times, and consistently high system availability. KNDS presents DiagLens - a portable, intelligent assistance solution designed to support maintainers directly during maintenance operations. It combines augmented reality, voice interaction and embedded intelligence to provide immediate access to the right information, at the right time, without interrupting the task.

**Come and meet us at KNDS booth ExtPe6b D90**

**Media briefings schedule all along the week available here: [knds.com/en/eurosatory](https://knds.com/en/eurosatory)**

### **About KNDS**

KNDS is a leading pan-European land defense company, uniting nearly 11,000 employees and generating €4.4 billion in revenue in 2025. With a strong order backlog of €33.1 billion as of December 31, 2025, the group delivers innovative complete mission solutions built on state-of-the-art technologies. Leveraging deep industrial expertise and strong partnerships, KNDS develops open, interoperable solutions combining manned and unmanned systems, designed to meet tomorrow's operational challenges. As a prime contractor, it provides full system-of-systems capabilities, from platforms to ammunition and services, managing the entire value chain and encompassing complete product life cycles.

Born from the alliance of Nexter and Krauss-Maffei Wegmann, KNDS embodies the path toward a collective and efficient future for the sovereignty of Europe's defense by supporting the standardization and interoperability between European and NATO forces.

Trusted by 40+ armies worldwide, including 24 European armed forces, KNDS benefits from decades of combat-proven experience. KNDS embodies a united, efficient model to enhance stability and long-term security in Europe and beyond.
