

## **RAMPINI AT EUROSATORY 2026: INTEGRATED SOLUTIONS FOR DEFENCE AND MISSION-CRITICAL OPERATIONS**

Passignano sul Trasimeno (Italy), June 2026 – Rampini Carlo S.p.A., an Italian company operating since 1945 in the design and manufacture of special-purpose vehicles, energy systems and advanced technological solutions for highly demanding operational environments, will participate in Eurosatory 2026, the world's leading exhibition dedicated to defence and land security.

Rampini will showcase its engineering, integration and manufacturing capabilities through the display of a 20-foot ISO sheltered system, configured as a multifunctional platform for tactical and logistical applications.

The exhibited system integrates a highly modular shelter, a leveling system, a telescopic mast and a power generation unit for rapid deployment, providing a complete solution for command-and-control operations, telecommunications, power support and mission-critical applications in complex operational scenarios.

The configuration has been developed to ensure high mobility, rapid deployment and maximum adaptability to customer operational requirements, reflecting Rampini's commitment to customized, high-technology integrated solutions.

With more than eighty years of industrial experience, Rampini is today a trusted partner of leading national and international defence organizations, offering multidisciplinary expertise ranging from mechanical engineering and electronics to energy systems and advanced metal fabrication.

The company manages the entire product development cycle in-house, from design and prototyping to manufacturing, testing and validation, ensuring the highest quality standards and compliance with the requirements of the most demanding industrial and military programs.

"Innovation has always been one of the key drivers of our growth," says Andrea Rampini, President and Chief Executive Officer of Rampini Carlo S.p.A. "Participating in Eurosatory allows us to present our expertise to an international audience and strengthen Rampini's position as a reliable technology partner in the development of advanced defence and security solutions. Investing in research and development means anticipating our customers' operational needs and transforming them into reliable, high-performance products."

Rampini's participation in Eurosatory 2026 confirms the company's commitment to advancing defence technologies, strengthening its presence in international markets and promoting the excellence of Italian industry worldwide.

### **Meet Us at Eurosatory 2026!**

The Rampini team will be pleased to welcome customers, institutional partners and industry professionals at Hall 5B – Stand B454 to present its latest solutions and discuss new business and cooperation opportunities.
